# STRETCH™

RESEARCH EDITION

**Human-centric:** Stretch is a capable mobile cobot designed to work around people in homes and workplaces.

**Capable:** Stretch is a versatile platform for teleoperation and autonomy. From autonomous navigation and picking, to playing teleoperated games with kids, Stretch can do it!

**Portable:** Stretch is easy to wheel around and transport (just a little over 50 lb).

**Open source:** All of Stretch's software is open source and available on GitHub.
